Preliminary Investigation Results from DcRu-1151: A Locarno-Age Living and Processing Site at Esquimalt Lagoon.

By Kristi Bowie and Kira Kristensen

DcRu-1151 is located approximately 500 m inland from the Esquimalt Lagoon in Colwood, B.C., in the vicinity of the new Aquattro townhouse and condominium development. Archaeological investigations were conducted by I.R. Wilson Consultants Ltd. (now Stantec) in late 2007 and continued until Spring 2008. Investigations into the site revealed what is anticipated to be a Locarno Phase semi-subterranean house-floor containing a carefully constructed hearth. Adjacent to this a second smaller semi-subterranean feature containing an unusual clay- and rock-lined oven or hearth. These features are believed to be unique to the region. DcRu-1151 shares a contemporaneous time frame with DcRu-74, located within 500 m southeast of DcRu-1151. DcRu-74 is believed to be the only known Locarno-period wet site on southern Vancouver Island.

This talk will discuss the spatial distribution of these unique features as they offer a unique opportunity to explore the construction and use of Locarno-age housing. We also hope to encourage dialogue about their function.

Kira Kristensen is a professional member of the BC Association of Professional Archaeologist (BCAPA) and has been working in consulting archaeology since 2000. She has supervised and conducted extensive archaeological surveys, impact assessments and excavations in British Columbia from the northeastern portions of the province to Vancouver Island. Originally from Vancouver Island, Kira is happy to be home and living in Port Alberni, BC and is enjoying working for Madrone Environmental Services in Duncan, BC.

Kristi Bowie is currently a fulltime graduate student at UVic completing her MA in Anthropology. For over eight years she has been consulting in archaeology, paleontology and forensics for organizations including the RCMP, American Museum of Natural History and most recently several years with I.R. Wilson Consultants Ltd., now Stantec. Kristi's MA studies are centred on the issue of Indigenous children who are considered missing and reputed to be buried in unmarked burial and cemetery sites associated with former residential schools in Canada.
